## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

Each of claims 13 and 14 is confusing to the point of being indefinite because claim 11 addresses "A grading mask" which is a physical entity or a physical construct which produces a tangible result, wherein each of claims 13 and 14 state "wherein the grading masks are in a digital form" which indicate that each of the masks is data and is not a physical entity or a physical construct.

## Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 13 and 14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. See MPEP § 2106.01.

As noted in the 112 rejection above the grading mask is a physical entity or a physical

Page 3

construct which produces a tangible result. Claims 13 and 14 reduce the mask(s) to data which

is "nonfunctional descriptive material", regardless if stored on a computer readable medium or

not, as discussed in MPEP § 2106.01.

Furthermore, please note the following pages and lines in the Applicant's specification

which support the above rejections:

(a) page 5 lines 19-21,

(b) page 7 lines 11-13 and 26-28, and

(c) page 15 lines 20-23.

Claim Objections

5. Claims 2-4 and 6-8 are objected to because of the following informalities:

Claim 2: "grading regions" in line 4 should start with --the-- in order to properly refer to

its antecedent.

Claim 3:

(a) "grading regions" in line 4 should start with --of the-- in order to properly refer to its

antecedent.

(b) "one or more characteristic points" in line 5 should start with --the-- in order to

properly refer to its antecedent.

Claim 4: "grading regions" in line 11 should start with -- of the-- in order to properly

refer to its antecedent.

Application/Control Number: 10/572,771 Page 4

Art Unit: 2841

Claim 8: "a constraint" in line 2 should start with --the-- in order to properly refer to its

antecedent introduced in claim 7.

Allowable Subject Matter

6. Claims 1, 5 and 9-12 are allowable.

7. Claims 2-4 and 6-8 would be allowable if rewritten to overcome the claim objections set

forth in this Office Action for claims 2-4 and 8 and to include all of the limitations of the base

claim and any intervening claims.

8. As allowable subject matter has been indicated, applicant's reply must either comply with

all formal requirements or specifically traverse each requirement not complied with. See 37

CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

9. The prior art made of record is considered pertinent to applicant's disclosure. The prior

art cited in PTO-892 disclose related methods and masks.

10. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to R. Alexander Smith whose telephone number is 571-272-2251.

The examiner can normally be reached on Monday through Friday from 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Dean A. Reichard can be reached on 571-272-1984. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.
